Our Company is dedicated on cars of the future ; we added a new type of energy not used so far... **the Solar Energy** The Solar Panel charges the batteries which activate the 3V motor ; in the future we think about having a more powerful motor. We also used **ecological materials** like «Paper-Mache», Cardboards to protect and respect our Planet and stay on the market place and sustain employment.

We focused on our customer requirements

The TOY CAR

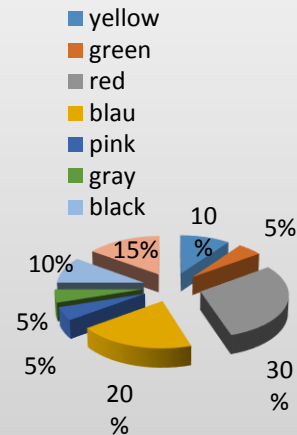

## Type of Vehicle

- Superhero
- Truck
- Pet/bird
- Race car

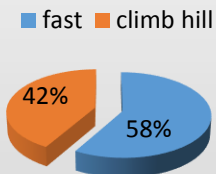

Build on a **3:1** gear train components

## Colors

## Progression Type

With Solar Panel
