Written Proposal:

Our Car Design, Motto, And logo

Hello, our car is dedicated to the 27 time World Series Champion New York Yankees. Our company logo represents the people in our group. The three J's are for the three people in our group whose names start with J they are Jose, Jordan, and Jay, and the X stands for the only person in our group whose name starts with X and that is Xavier. Our group motto "Fun 4 All" means that our car is fun for people of all ages. We got our logo and motto by drawing various designs. We ended up sticking to the logo and motto because we figured that they would make the most sense for people from the ages of 6 to 10. We thought that that would be the best motto and logo because it seemed like the easiest motto and logo that would make sense for children ages 6 to 10.

Jobs And Contributions

We had four individual jobs in our group; they were construction manager, equipment manager, recorder/reporter, and design manager. The way each of our team members contributed was that Jay brought in some materials to use for the car, Jose drew most of the designs, Xavier helped in the construction of our car, and Jordan gave us the inspiration of the Yankee Mobile.

Why People Want Our Car

Customers would want to buy our car because we are giving them what they asked for. We know that because our market survey shows that people want a car that was gold, blue, and red also it had to have a team logo. We chose the Yankees logo by picking a few teams that used those three colors and did a survey on the teams. When we totaled up the tallies the Yankee car had 16

votes, the Patriots car had 9 votes, the Giants had 8 votes, and the Red Sox had 1 vote.

Biographies

Our first group member is Jay he is a twelve year-old student at Rogers Park Middle School, he said that he enjoyed doing this project. Our second group member is Jordan he is also a twelve year-old student at Rogers Park Middle School he said that this was very fun especially when we got to build the car. Our third group member is Jose he is a twelve year-old student at Rogers Park Middle School. He said he loved to design and draw the car. Our fourth and final group member is Xavier he is a twelve year-old student at Rogers Park Middle School too he said that this experience was incredible and he would love to do this again.

Meet The Standards

The standards our car needed to meet was that it needed to do at least one of the following three objectives they are go 1 meter in 2 seconds or less, Climb a 15 degree slope for one meter under its power in two seconds or less, or climb a 30 degree slope from a standing start under its own power with no time limit. The objective that our car does is that it can climb a 30 degree slope for 1 meter with no time limit.
